

About **DR. DAVID SATLOFF**

Dr. Satloff is the clinical director of two dental practices in North Attleboro and Seekonk, Massachusetts. Telephone numbers are 508-695-1078 and 508-336-7755. Website is viewable at **www.biologicdentist.com**

Dr. Satloff earned his **DMD** in dentistry from Tufts University (1981), **EJD** in law from Concord University (2008), **MS** in biomechanical trauma from Lynn University (1997), **MBA** from Bryant College (1986), **CAGS** in health care from Bryant College (1990), certification in Traditional Chinese Medicine (**TCM**) from Chengdu University (2003), certification in TM disorders from Tufts University (1988), certification in aesthetic dentistry from CWRU (1991) and Tufts University (1995), and is a MD candidate at UHSA School of Medicine. Dr. Satloff is most proud of his volunteer efforts in the AO peace corps program (1981-1982) and in China (2003).

Dr. Satloff advocates the use of low toxic biocompatible dentistry and always uses a mercury vapor suction whenever removing mercury based fillings from teeth. The office engages mercury mobilization for those patients desiring the removal and detoxification of mercury from their body.

Dr. Satloff is the first university trained dentist in aesthetic dentistry in New England and has completed hundreds of cosmetic dental makeovers. The office features invisible orthodontics with clear tooth aligners for straightening teeth and creating a confident smile.

Dr. Satloff possesses both Fellowship and Mastership status in the Academy of General Dentistry and is board certification eligible. He is also CNS and CCN eligible in nutrition. The office utilizes lab testing of saliva for pH buffering assessment and urine testing to check for biochemical balances and irregularities in interested patients.

Dr. Satloff, recognized as the **first dentist in the United States** to achieve diplomat status in the American Academy of Pain Management and named editorial advisor to the Journal of Pain Management, regularly treats difficult to manage pain disorders of the mouth and upper quarter of the body. He is the first doctor in New England with a masters degree in MVA trauma and is the first doctor in New England named as Regent in the International College of Craniomandibular Orthopedics which deals with TM disorders and neuromuscular dentistry.

Dr. Satloff employs Eastern medicine based upon noninvasive proteomic testing for tough to treat dental issues and associated medical concerns relating to ANS blockage of the upper quarter of the body. Such testing is especially pertinent to those with a pain profile and for those with a history of cancer.
